LIMITS, ALERTS & WARNINGS

MORS ALERTS & WARNINGS™

FOR ALL MORS USERS.
OFFERS A REAL-TIME ALERTING AND WARNING MECHANISM FOR
BUSINESS AND RISK MANAGEMENT MONITORING PURPOSES.

KEY FEATURES

- Real-time follow-up of all activities in the system on 24/7 bases.
- Saving, categorising and documenting all activities.
- Proactive alerts (always on, always alert).
- User specific alerts by responsibility area.
- Log listings of all actions taken.
- Releases users time from unnecessary routines to understanding the business by:
 - Pointing out prioritised tasks, directing users to concentrate on relevant issues.
 - Guiding IT and operations resources.
 - Keeping non MORS using senior management informed about issues needing their attention.

MORS Alerts & Warnings performs automated real-time controls against set limits.

Like all MORS Add-On solutions MORS Alerts & Warnings integrates seamlessly with other MORS solutions, offering additional functionalities for Treasury, Risk Management, Liquidity Management and ALM (Asset and Liability Management) in banks.

LIMITS, ALERTS & WARNINGS IN REAL TIME

INCLUDING STANDARD MORS FUNCTIONALITIES:

REAL-TIME: analysis, calculations, forecasting and simulation.

DRILL-DOWN AND DRILL-THROUGH: Full drill-down to cash-flow and transaction level.

MERGING AND SORTING DATA: Calculations and data can be sorted on any sublevel, such as legal entity, currency, business unit, portfolio.

EARLY WARNING INDICATORS with alerts, warnings and limits on different risk components.

BCBS239 COMPLIANCE
